

## New Opportunities Event OASIS Symposium 2008

We have a new kind of event at the Symposium. The goal is to expose opportunities for synergy between OASIS standards and technology and other areas.

Monday, April 28<sup>th</sup>, at 7:30pm (in the Monterey Room, Santa Clara Marriott) OASIS is hosting a "Round Table" session discussing challenges in **Green Buildings, Building Controls, Intelligent Power Grid, and power demand management** (including current issues in California utility power control).

We're concentrating on challenges, not solutions. This will be an informal panel, led by industry experts, exposing challenges and opportunities for people skilled at the things OASIS works on, such as eCommerce, SOA, and related technologies.

We're calling it a "Round Table" because it's not the same as a traditional panel discussion; it will be more interactive, and there are no prepared slides (but will likely be information to take with you).

Panelists include

- William Cox (OASIS Technical Advisory Board), Moderator
- Rik Drummond (The Drummond Group)
- Toby Considine (OBIX, University of North Carolina)
- Girish Ghatikar (Lawrence Berkeley Labs).

Come join us at 7:30 PM on Monday, April 28 in the Monterey Room for a chance to apply your skills to some new and interesting problems.
